*Acrylic Sheet*

®

**GENERAL CATALOG**

## INTRODUCTION

Welcome to the world of Spartech Polycast, the world's largest supplier of specialty cell-cast acrylic sheet. In this catalog you will find almost everything you need to know about our products and services.

We strive to supply the highest quality acrylic sheet with the best possible service. This has been the cornerstone of Polycast's success. Our willingness to work with our customers to solve their problems has made us the largest acrylic sheet supplier to the aerospace industry, as well as a major force in the transportation, security, optics and acrylic furniture industries.

Our strategically placed warehouses around the country allow us to meet your needs quickly, giving you – the customer – a greater sense of security, knowing that your orders will be handled as quickly in the future as they are today.

We at Spartech Polycast are constantly developing new products and services to help you satisfy your business needs. If you don't find the answer you seek in this catalog, we would be delighted to help you solve your acrylic sheeting problems. Call us at 800-243-9002 or 203-327-6010, or e-mail us at [polycast.marketing@spartech.com](mailto:polycast.marketing@spartech.com). Visit our website at [www.spartech.com](http://www.spartech.com).

## SPECIAL SERVICES

### Unique Properties:

Polycast can modify its acrylic sheet to change certain physical, chemical or optical properties to help meet your requirements, including the introduction of sensitive dyes and other additives.

### Custom Colors

Spartech Polycast has an extensive color database. Custom colors can be quoted upon your request.

### Cut To Size

Polycast will cut sheet to your size requirements – saving you time and money.

### Special Tolerance Control

Polycast can achieve special tolerances for more critical applications.

### Technical Services

Field technical support from Polycast's sales engineering staff to augment Polycast's extensive product line.

## SPECIAL PRODUCTS

### Bullet Resisting Sheet - MP 1.25, SAR HP 1.25 & SP 1.25

Polycast produces sheet listed by Underwriters Laboratories as bullet resisting for Level 1 Medium Power (MP 1.25) which is also available with an SAR (abrasion resistant coating), Level 2 High Power (SAR HP 1.25) and Level 3 Super Power (SP 1.25) small arms, both of which come standard with an abrasion resistant coating. Polycast bullet resisting sheet has higher optical clarity than glass or polycarbonate, and can be easily machined and polished. It is available in bronze, as well as clear.

### Super Abrasion Resistant Acrylic Sheet (S-A-R)

Spartech Polycast S-A-R is produced by applying a very hard, highly cross-linked polysilicate coating to a substrate. This coating provides Spartech Polycast SAR sheet with a surface that has 45 times the abrasion resistance of uncoated acrylic. It also has five times the impact resistance of glass and weighs half as much.

### Ultraviolet Transmitting Sheet - UVT

Provides increased transmission of ultraviolet wavelengths between 280 and 360 nanometers.

### Solacryl® - SUVT (Stabilized Ultraviolet Transmitting Sheet)

Provides increased resistance and degradation to UV exposure, while transmitting increased UV suitable for suntan beds.

### Ultraviolet Filtering Sheet - UF-96, UF-3 & UF-4

Provides increased protection from ultraviolet wavelengths. UF-96 and UF-3 block all UV light below 395 nanometers. UF-4 blocks all UV light below 385 nanometers.

### Infrared Transmitting Sheet - POLY 2711

A special formula that blocks all visible light, but allows infrared wavelengths to pass through. Specially suited for sophisticated security systems based on infrared technology.

### Scintillator and Wavelength Shifter Sheet

Utilizes a special formula that produces visible light when bombarded with sub-atomic particles.

### Pressurized Vehicle for Human Occupancy - PVHO

Polycast is the major supplier of acrylic sheet to the PVHO market. This highly critical application utilizes our expertise in producing optically superior sheet in thick sections.

### Extra Thick Sheet

Sheet thicker than 4.500" is available as composite casting. The sheet is optically superior when viewed through the surface; however, polished edges may show the original casting surfaces as lines. This material meets the PVHO requirements.

### Close Tolerance Sheet

Sheet which maintains closer thickness tolerances than standard commercial grade sheet.

### Textured Sheet

Sheet is available with a matte (GL-15) or non-glare (GL-99) finish, in clear and colors.

### National Sanitation Foundation - NSF

A special formulation that meets the requirements of the NSF for food contact.

### Preshrunk Sheet

Sheet that is thermally preshrunk, but does not meet MIL-P-5425. Available in thicknesses of .060" to 4.250".

### FDA

An acrylic sheet which complies with the Food and Drug Administration's regulations concerning food contact applications as described in 21 CFR 177.1010 for all food types, including alcoholic beverages in room temperature or refrigerated applications.

### Poly FR9

Interior acrylic material ideal for aircraft applications where low flame spread and low smoke generation are desirable.

### Poly 900

A semi-cross-linked material formulated to meet British specification DTD-5592.

### Military Specification Sheet

Polycast produces sheet covered in Mil-P-5425, Mil-P-8184 and Mil-P-25690 whose inherent properties include; increased weather-ability, high solvent and craze resistance and lower water absorption. Material manufactured to Mil-PRF-25690, maintains process control from cell casting to stretching operation. Poly 2000 (Mil-P-25690) is a biaxially stretched acrylic sheet derived from Mil-P-8184 base material. It offers enhanced craze properties and increased crack resistance, primarily for those applications involving pressurized aircraft. These technologically advanced materials are supplied primarily to the Aviation industry.

# PHYSICAL PROPERTIES

Typical Properties (.250" unless noted)

The following data are average values for Polycast commercial grade acrylic sheet and should not be used for any specific purpose. Spartech Polycast will furnish any additional information you may require.

<sup>1</sup> ADDITIONAL DATA, CODES AND APPROVALS ARE AVAILABLE UPON REQUEST

All values shown are for 0.250" thickness sheet, unless otherwise noted. Asterisk (\*) values will change with thickness. Difference in length and width, as measured at room temperature, before and after heating above 300 deg F.

<sup>2</sup> Unshrunk sheet will shrink in size by approximately 2% and increase in thickness by approximately 4% when heated to forming temperature.

<sup>4</sup> Not ASTM method.

\*\* Varies with thickness.

\*\*\* Because the surface of Polycast SAR has a lower refractive index than the substrate, the amount of back reflectance is reduced and the transmittance increased.

- (A) Steel Wool Rotary Test - This severe abrasion uses a 1.25" square pad of commercially available 0000 grade steel wool. The steel wool pad is loaded with appropriate weights to give either 12 or 24 psi pressure and is revolved five times.
- (B) Simulated Cleaning Test - An abrasive water slurry of a commercially available standard test dust is placed on the sample. It is then stroked 360 times with a felt pad under an approximately 2.0 psi load. @ MP 1.25 also available in SAR abrasion resistant coating

## COLOR

Colors and whites listed below are standard items and may be ordered in the case and pallet quantities listed on inside back cover. These colors are also available in other sizes and thicknesses as non-standard items. Polycast manufactures many other colors. Please call for availability.

## APPROVALS AND SPECIFICATIONS

# GENERAL CATALOG

### MEETS THE TEST REQUIREMENTS OF:

**ANSI Z97.1 (American National Standards Institute Specification);** defines performance criteria for safety glazing used in buildings, concerning impact hardness and degradation after accelerated weathering. Polycast acrylic sheet in thicknesses greater than 0.099 are certified as complying.

**ANSI Z26.1 and FMVSS 205 (Federal Motor Vehicle Safety Standard);** define performance characteristics of safety glazing for passenger car, trailers, trucks, buses, and motorcycles, including (but not limited to) impact resistance, chemical resistance, abrasion resistance, flammability, weathering, and optics.

**NSF Grade Sheet;** Polycast offers an acrylic sheet which meets the requirements for the National Sanitation Foundation.

**FDA;** Food and Drug Administration's regulations concerning food contact applications as described in 21 CFR 177.1010 for all food types, including alcoholic beverages in room temperature or refrigerated applications.

**Dade County Approval;** Approved under Section 203 and 204 of the South Florida Building Code Governing the use of Alternate Materials and Types of Construction.

**UL 94HB;** Underwriters Laboratories recognized for flammability\* of plastic materials for parts in devices and appliances. Polycast acrylic is recognized under UL 94HB, with some exceptions.

**UL 723;** Underwriters Laboratories classified for surfaces burning characteristics of a building material. Polycast acrylic 3/8 inches and greater is classified with the following test values: flame spread = 140; smoke developed = greater than 500.

**UL 746A;** Underwriters Laboratories recognized for polymeric materials in electrical applications. Contact inside sales for further information.

**UL 752;** Underwriters Laboratories listed for bullet-resisting equipment. Polycast offers the following in clear and bronze:  
- Level 1, MP 1.25, SAR MP 1.25 Medium power, small arms resistant.  
- Level 2, SAR HP 1.25 High power, small arms resistant.  
- Level 3, SP 1.25 Super power, small arms resistant.

**FAR 25.853 (Federal Aviation Regulation);** defines the flammability requirements for acrylic windows and signs for aircraft interiors. Polycast sheet .049" and greater meets this requirement.

**FMVSS-302 (Federal Motor Vehicle Safety Standard);** defines burn rates of interior materials for passenger cars, trailers, trucks and buses. All Polycast materials meet this standard.

**ASME PVHO-I and MIL-C-24449;** defines the requirements for materials used in the fabrication of windows for service in pressure vessels for human occupancy. Polycast material meets these requirements.

**MIL-DTL-24191;** Shipboard application of illumination and signal lighting. Defines the requirements of the material intended for use in the fabrication of lighting fixtures for Naval service. Among the associated tests are flammability, deflection temperature, flexural strength, impact strength and optical properties. Polycast material meets these requirements.

**City of New York, Dept. of Buildings;** Accepted for use, City of New York, Department of Buildings, as glazing material in lieu of glass in non-rated windows, doors and in skylights in sheet thicknesses up to 3/8-inch maximum, and for ground, wall and roof sign combustible material, where permitted by Code. File number MEA 80-82-M.

**City of New York, Board of Standards and Appeals;** Approved for use in safety glazing applications. Calendar number 1997-61-SM.

**Consumer Product Safety Commission (CPSC);** Polycast acrylic sheet .080 and greater complies with the requirements of the Consumer Product Safety Act and the CPSC Safety Standard of Architectural Glazing materials, 16 CFR 1201 for both Category I and Category II.

### POLYCAST ACRYLIC SHEET CONFORMS TO THE FOLLOWING SPECIFICATIONS (CURRENT EDITIONS)

**ASTM D-702;** defines physical properties which acrylics should meet or exceed, such as tensile strength, refractive index, specific gravity, deflection temperature, and impact strength. Polycast acrylic sheet meets or exceeds the requirements for all types of grades of sheet of this specification.

**ASTM D-4802;** A specification covering monolithic methacrylate sheet produced by the cell-cast method. Polycast acrylic sheet in thickness .030-4.250 meets or exceeds the requirements for Category A-I, finish 1,2,3; Types UVA & UVT.

**AMS-L-P-391;** An S.A.E. material specification referencing specific Federal quality standards and ASTM test methods. Polycast acrylic sheet in thickness' 0.030-4.250 meets or exceeds the requirements for item A, Type I, II and III, Grade A, B, or C.

**MIL-P-8184;** military specification covering modified acrylic (specially designed for superior resistance to chemical attack). Materials supplied for conformance to this specification are Polycast Poly-76® and Poly-84® (available in both Type I and II and Class 1 and 2). All products are on the Qualified Products list for this Mil-Spec.

**MIL-P-25690;** military specification covering stretched acrylic sheet specially designed from Mil-P-8184 base material. It offers enhanced craze properties and increased crack resistance. Material supplied for conformance to this specification is identified as Poly 2000™.

**MIL-P-5425;** military specifications covering heat-resistant, preshrunk, clear, and colored acrylic sheet. Material supplied for conformance for this specification is identified by the name POLY II®. Polycast is qualified to furnish sheets in thickness 0.060-1.000 to meet this specification.

There are many more standards, codes, and specifications to which Polycast can demonstrate compliance. Inquires regarding your particular problems or requirements should be directed to the Polycast Marketing Department. Call 1-800-243-9002 or email [polycast.marketing@spartech.com](mailto:polycast.marketing@spartech.com).

\*This term and any corresponding data refer to typical performance in the specific tests indicated and should not be construed to imply this material's behavior under actual fire conditions.

## CONDITIONS AND TERMS OF SALE

### MINIMUM PREPAID SHIPMENTS

Seller will prepay freight on a minimum shipment of one regular case to one destination within the continental U.S. except Alaska and Hawaii. Seller reserves the right to select method, route, carrier and point of origin.

### MASKED MATERIAL

Prices distributed are for sheet with low-tack masking on two sides unless otherwise specified.

### TRIMMED MATERIAL

Sheets will be trimmed, unless specified otherwise.

### QUOTES

Colors, sizes, quantities and thicknesses not listed in our catalog pages will be quoted upon request.

### PACKAGES

Seller has a wide variety of packaging plans available to meet your needs. Please refer to your current Price List for details on such packaging plans as MIXED CASES, STANDARD and NON STANDARD MIXED PALLETS to mention just a few. Refer to inside back cover of this catalog for Standard Packing quantities.

### CONDITIONS AND TERMS OF SALES

1%, 10, net 30 days, F.O.B. plant or warehouse. Interest will be charged after maturity at the rate of 1 1/2% per month or the maximum state legal interest rate, whichever is lower.

**NOTE:** Shipments against order will be billed at prices and terms in effect on date of shipment. Prices subject to change without notice.

No claim of any kind shall be greater in amount than the purchase price of the goods in respect of which such damages are claimed. Failure to give notice of claim in writing within thirty (30) days from the date of delivery, shall constitute a waiver by Buyer of all claims in respect to such goods. The remedy hereby provided shall be the exclusive and sole remedy of the Buyer; and right of the Buyer to consequential damages is excluded. No claim will be allowed unless approved in writing by an authorized representative of Seller. Goods shall not be returned to Seller without Seller's authorization. All goods returned shall be packaged to prevent subsequent damage. Credit will be issued according to the condition in which the sheets are returned. No liability shall result from delay in performance or non-performance, caused by circumstances beyond the control of Seller, including, but not limited to: act of God, fire, flood, war, Government action, accident, labor trouble or shortage, inability to obtain material, equipment or transportation. Quantities so affected may be eliminated from the order without liability, but the order shall remain otherwise unaffected. If, by reason of any such circumstances, Seller is unable to supply the total demand for products specified herein, Seller may distribute its available supply among any or all purchasers, on such basis as it may deem fair and practical without liability for any failure of performance which may result therefrom. Seller may discontinue performance if Buyer's credit becomes unsatisfactory to Seller. Upon request, Seller will endeavor to furnish such technical advice as it has available in reference to the use of its products by Buyer. It is expressly understood that any technical advice furnished by Seller with reference to the use of its products is given gratis, and the Seller assumes no obligation or liability for the advice given or results obtained. All such advice being given and accepted at Buyer's risk.

These conditions of sale supersede all prior or contemporary oral or written understandings, agreements, or recommendations and may not be added to, modified, rescinded, or waived, in whole or part, except by a writing signed by an authorized representative of Seller, not withstanding any language that may be contained in any form of Buyer and not withstanding any delivery of goods by Seller.

### CANCELLATION POLICY

No cancellation charge on any material if cancelled before manufacture.

25% cancellation charge for stock items PLUS freight, warehousing and handling if cancelled material was shipped.

60% cancellation charge on non-stock special items which were manufactured, PLUS freight, warehousing and handling if cancelled material was shipped.
