

POLYCAST®

Cell Cast Acrylic

General Catalog

Spartech Polycast®—Ready to perform in your products—in air, on the ground, in the human body

Polycast: The one material with so many diverse applications. Spartech is shaping the future of plastics through material strength and application expertise. This is especially evident in our Polycast specialty cell-cast acrylic sheet – a plastic solution that is sustainable, diverse, reliable and helps bring innovative ideas to life. We're the world's largest supplier of this highly versatile product for industries specializing in aerospace, transportation, security, optics and acrylic furniture.

The quality of Polycast is evident in the variety of applications it is used for and the fact that we work with our customers to meet their most demanding material requirements. This kind of service is matched by our supply chain reliability made possible in part by our strategically placed manufacturing locations around the country. It's how we deliver peace of mind as we focus on solutions to deliver material orders on time and within budget.

What we achieve today is improved upon tomorrow as we constantly develop new Polycast products and services to help you achieve manufacturing success. If you don't find the exact material you need in this catalog, simply contact Spartech today and our material engineers and sales team can help solve your acrylic sheeting challenges.

SPECIAL SERVICES

Unique Properties

Polycast can modify its acrylic sheet to change certain physical, chemical or optical properties to help meet your requirements, including the introduction of sensitive dyes and other additives.

Custom Colors

Polycast has an extensive color database. Custom colors can be quoted upon your request.

Cut To Size

Polycast will cut sheet to your size requirements—saving you time and money.

Special Tolerance Control

Polycast can achieve special tolerances for more critical applications.

Technical Services

Field technical support from Polycast's sales engineering staff to augment Polycast's extensive product line.

SPECIAL PRODUCTS

Acryshield™ Bullet Resisting Sheet - MP1.25, SARMP1.25, HP1.25, SARHP1.25, SP1.25, and SMG1.25

Polycast produces sheet listed by Underwriters Laboratories as bullet resisting for Level I Medium Power (MP 1.25) which is also available with an SAR (abrasion resistant coating), Level 2 High Power (SAR HP 1.25) and Level 3 Super Power (SP 1.25) small arms, both of which come standard with an abrasion resistant coating. Polycast bullet resisting sheet has higher optical clarity than glass or polycarbonate, and can be easily machined and polished. It is available in bronze, as well as clear.

Super Abrasion Resistant Acrylic Sheet (S-A-R)

Polycast S-A-R is produced by applying a very hard, highly cross-linked polysilicate coating to a substrate. This coating provides Polycast SAR sheet with a surface that has 45 times the abrasion resistance of uncoated acrylic. It also has five times the impact resistance of glass and weighs half as much.

Ultraviolet Transmitting Sheet—UVT

Provides increased transmission of ultraviolet wavelengths between 280 and 360 nanometers.

Solacryl®—SUVT (Stabilized Ultraviolet Transmitting Sheet)

Provides increased resistance to degradation of UV exposure, while transmitting increased UV suitable for suntan beds.

Ultraviolet Filtering Sheet—UF-96, UF-3 and UF-4

Provides increased protection from ultraviolet wavelengths. UF-96 and UF-3 block all UV light below 395 nanometers. UF-4 blocks all UV light below 385 nanometers.

Infrared Transmitting Sheet—POLY 2711

A special formula that blocks all visible light, but allows infrared wavelengths to pass through. Specially suited for sophisticated security systems based on infrared technology.

Scintillator and Wavelength Shifter Sheet

Utilizes a special formula that produces visible light when bombarded with sub-atomic particles.

Pressurized Vehicle for Human Occupancy—PVHO

Polycast is the major supplier of acrylic sheet to the PVHO market. This highly critical application utilizes our expertise in producing optically superior sheet in thick sections.

Extra Thick Sheet

Sheet thicker than 4.500" is available as composite casting. The sheet is optically superior when viewed through the surface; however, polished edges may show the original casting surfaces as lines. This material meets the PVHO requirements.

Close Tolerance Sheet

Polycast® CT maintains closer thickness tolerances than standard ASTM 4802 commercial grade sheet (based on standard size sheets of 24" × 36"). Polycast® CT can also be manufactured in clear and colors, Infrared transmitting, UV filtering or transmitting, cross-linked or pre-shrunk and is suitable for FDA applications.

Preshrunk Sheet

Sheet that is thermally preshrunk, but does not meet MIL-P-5425. Available in thicknesses of .060" to 4.250".

National Sanitation Foundation—NSF

A special formulation that meets the requirements of the NSF for food contact.

FDA

An acrylic sheet which complies with the Food and Drug Administration's regulations concerning food contact applications as described in 21 CFR 177.1010 for all food types, including alcoholic beverages in room temperature or refrigerated applications.

Aircraft Quality

Our Aircraft Quality grade conforms to ASTM-D4802 and AMS-L-P-391, but is manufactured and inspected to the highest optical quality standards of Aerospace mil specs.

Poly 900

A semi-cross-linked material formulated to meet British specification DTD-5592.

Military Specification Sheet

Polycast produces sheet covered in Mil-P-5425, Mil-P-8184 and Mil-P-25690 whose inherent properties include; increased weatherability, high solvent and craze resistance and lower water absorption. Material manufactured to Mil-PRF-25690, maintains process control from cell casting to stretching operation. Poly 2000 (Mil-P-25690) is a biaxially stretched acrylic sheet derived from Mil-P-8184 base material. It offers enhanced craze properties and increased crack resistance, primarily for those applications involving pressurized aircraft. These technologically advanced materials are supplied primarily to the aviation industry. POLY II is our heat-resistant, preshrunk, clear and colored acrylic sheet formulated to meet military specification MILPRF-5425. We are qualified to furnish sheets in thicknesses 0.060"—1.000" to meet this specification.

UV Blocking & Solar Heat Control Cell Cast Acrylic Sheet

Polycast SolarControl® is a custom cell cast acrylic sheet solution that blocks out significant amounts of near-infrared (NIR) radiation while maintaining high visible light transmission. It is available in a wide variety of patented SolarControl® colors and light transmissions, including Night Vision Compatibility (NVG). This aircraft-quality monolithic glazing material can be manufactured to MIL-PRF-5425, 8184, and 25690; DTD-5592; L-P-391; ASTM D-4802 and other specifications.

¹ ADDITIONAL DATA, CODES AND APPROVALS ARE AVAILABLE UPON REQUEST. All values shown are for 0.250" thickness sheet, unless otherwise noted. Asterisk (*) values will change with thickness. Difference in length and width, as measured at room temperature, before and after heating above 300°F.

² Unshrunk sheet will shrink in size by approximately 2% and increase in thickness by approximately 4% when heated to forming temperature.

³ Not ASTM method.

** Varies with thickness.

*** Because the surface of Polycast SAR has a lower refractive index than the substrate, the amount of back reflectance is reduced and the transmittance increased.

(A) Steel Wool Rotary Test—This severe abrasion uses a 1.25" square pad of commercially available 0000 grade steel wool. The steel wool pad is loaded with appropriate weights to give either 12 or 24 psi pressure and is revolved five times.

(B) Simulated Cleaning Test—An abrasive water slurry of a commercially available standard test dust is placed on the sample. It is then stroked 360 times with a felt pad under an approximately 2.0 psi load. @ MP 1.25 also available in SAR abrasion resistant coating.

- **Standard Items:** Standard items may be ordered in standard packages (cases and pallets).
- **Non-Standard Items:** Contact Polycast® Customer Service for availability.

COLOR

Poly 76 & Poly 84 are available in most colors, manufactured in accordance with MIL-PRF-8184 insofar as the specification is applicable.

POLY II is available in most colors, manufactured in accordance with MIL-PRF-5425 insofar as the specification is applicable. Please contact Customer Service for further information.

¹ Refer to tolerance table on page 6.

² Intermediate thicknesses are available with special ordering requirements.

* Available with cutdowns from larger sizes. Tolerance of larger size prevails.

POLYCAST® POLY 2000 STRETCHED ACRYLIC

SHEET (MIL PRF 25690)

KEY ATTRIBUTES

- Largest sheet yields lower unit costs
- Superior optical quality
- Available in standard thicknesses

MANUFACTURING PERFORMANCE

- Offer tighter tolerances than standard mil spec (+/- .020" < .250"; >.250" +/- 10%), upon request
- Flexibility and consistency
- Control from cell casting to stretching

SERVICE

- Parts cut to your size and shape configurations
- Cradle to grave options
- Inventory levels exacted to your specifications
- Technical expertise and superior customer support

APPLICATIONS

Military, commercial and general aviation glazing for fixed and rotary wing:

- Aircraft cockpit windows
- Aircraft canopies
- Windscreens
- Cabin windows
- Outer laminates

PROPERTY	REQUIREMENT	TYPICAL VALUE
Angular Deviation*	7 minutes (more than 2" from edge)	1–3 min.

Dimension Stability	0.2% max. after natural weathering	0.11

*Special optical requirements will be considered.

APPROVALS AND SPECIFICATIONS

MEETS THE TEST REQUIREMENTS OF:

ANSI Z97.1 (American National Standards Institute Specification); defines performance criteria for safety glazing used in buildings, concerning impact hardness and degradation after accelerated weathering. Polycast acrylic sheet in thicknesses greater than 0.099 are certified as complying.

ANSI Z26.1 and FMVSS 205 (Federal Motor Vehicle Safety Standard); define performance characteristics of safety glazing for passenger car, trailers, trucks, buses, and motorcycles, including (but not limited to) impact resistance, chemical resistance, abrasion resistance, flammability, weathering, and optics.

NSF Grade Sheet; Polycast offers an acrylic sheet which meets the requirements for the National Sanitation Foundation Certified NSF Standard 51 for use in manufacturing food and beverage dispensing equipment. Certified colors: Clear, White, Green, Red, Blue

FDA; Food and Drug Administration's regulations concerning food contact applications as described in 21 CFR 177.1010 for all food types, including alcoholic beverages in room temperature or refrigerated applications.

UL 94HB; Underwriters Laboratories recognized for flammability* of plastic materials for parts in devices and appliances. Polycast acrylic is recognized under UL 94HB, with some exceptions.

UL 723; Underwriters Laboratories classified for surfaces burning characteristics of a building material. Polycast acrylic 3/8 inches and greater is classified with the following test values: flame spread = 140; smoke developed = greater than 500.

UL 746A; Underwriters Laboratories recognized for polymeric materials in electrical applications. Contact inside sales for further information.

UL 752; Underwriters Laboratories listed for bullet-resisting equipment. Polycast offers the following in clear and bronze:

- Level 1, MP 1.25, SAR MP 1.25 Medium power, small arms resistant.
- Level 2, SAR HP 1.25 High power, small arms resistant.
- Level 3, SP 1.25 Super power, small arms resistant.

FAR 25.853 (Federal Aviation Regulation); defines the flammability requirements for acrylic windows and signs for aircraft interiors. Polycast sheet .049" and greater meets this requirement.

FMVSS-302 (Federal Motor Vehicle Safety Standard); defines burn rates of interior materials for passenger cars, trailers, trucks and buses. All Polycast materials meet this standard.

ASME PVHO-1 and MIL-C-24449; defines the requirements for materials used in the fabrication of windows for service in pressure vessels for human occupancy. Polycast material meets these requirements.

MIL-DTL-24191; Shipboard application of illumination and signal lighting. Defines the requirements of the material intended for use in the fabrication of lighting fixtures for Naval service. Among the associated tests are flammability, deflection temperature, flexural strength, impact strength and optical properties. Polycast material meets these requirements.

City of New York, Dept. of Buildings; Accepted for use, City of New York, Department of Buildings, as glazing material in lieu of glass in non-rated windows, doors and in skylights in sheet thicknesses up to 3/8-inch maximum, and for ground, wall and roof sign combustible material, where permitted by Code. File number MEA 80-82-M.

City of New York, Board of Standards and Appeals; Approved for use in safety glazing applications. Calendar number 1997-61-SM.

Consumer Product Safety Commission (CPSC); Polycast acrylic sheet .080 and greater complies with the requirements of the Consumer Product Safety Act and the CPSC Safety Standard of Architectural Glazing materials, 16 CFR 1201 for both Category I and Category II.

POLYCAST ACRYLIC SHEET CONFORMS TO THE FOLLOWING SPECIFICATIONS (Current Editions)

ASTM D702; defines physical properties which acrylics should meet or exceed, such as tensile strength, refractive index, specific gravity, deflection temperature, and impact strength. Polycast acrylic sheet meets or exceeds the requirements for all types of grades of sheet of this specification.

ASTM D4802; A specification covering monolithic methacrylate sheet produced by the cell-cast method. Polycast acrylic sheet in thickness 0.030-4.250 meets or exceeds the requirements for Category A-1, finish 1,2,3; Types UVA & UVT.

AMS-L-P-391; An S.A.E. material specification referencing specific Federal quality standards and ASTM test methods. Polycast acrylic sheet in thickness 0.030-4.250 meets or exceeds the requirements for item A, Type I, II and III, Grade A, B, or C.

MIL-P-8184; military specification covering modified acrylic (specially designed for superior resistance to chemical attack). Materials supplied for conformance to this specification are Polycast Poly-76® and Poly-84® (available in both Type I and II and Class 1 and 2). All products are on the Qualified Products list for this Mil-Spec.

MIL-P-25690; military specification covering stretched acrylic sheet specially designed from Mil-P-8184 base material. It offers enhanced craze properties and increased crack resistance. Material supplied for conformance to this specification is identified as Poly 2000™.

MIL-P-5425; military specifications covering heat-resistant, preshrunk, clear, and colored acrylic sheet. Material supplied for conformance for this specification is identified by the name POLY II®. Polycast is qualified to furnish sheets in thickness 0.060-1.000 to meet this specification.

There are many more standards, codes, and specifications to which Polycast can demonstrate compliance. Inquiries regarding your particular problems or requirements should be directed to the Polycast Marketing Department. Call 1-800-243-9002 or email polycast.marketing@spartech.com.

*This term and any corresponding data refer to typical performance in the specific tests indicated and should not be construed to imply this material's behavior under actual fire conditions.
